## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nagata et al.

Nagata et al discloses the process of making a deep-fried bean curd of any desired shape comprising the mixing and emulsifying of soybean protein isolate, fat (soybean oil) and water into a dough material wherein a coagulant solution (e.g. calcium chloride; e.g. 1% wt.) is then added, the dough shaped, and then deep fried (cols. 4-6).

The claims further call for the particular amounts of the various dough ingredients. However, such determination would have been well within the purview of a skilled artisan, and it would have been obvious to one having ordinary skill in the art at the time of the invention to have arrived at such amounts through routine experimental optimization.

The claims further call for the product to be in the form of a pouch. Nagata et al discloses that any shape may be formed. Deep-fried soy products in the shape of pouches are notoriously well known as taught, for example, by Mother Earth News or JP 2-100647 (see Abstract). It would have been further obvious to have prepared the fried soy protein of Nagata et al in a pouch form as a matter of preference of a

conventional format/shape for such material.

***Response to Arguments***
